

LAVINIA DONATO RIBEIRO

FULL STACK DEVELOPER & CLOUD COMPUTING ARCHITECT

✉ lavinia.ribeiro@maisunifacisa.com.br | 🌐 <https://scriptlver.github.io/> | 🔗 <https://www.linkedin.com/in/laviniaaribeirodev/> | ☎ +55 (83) 99630-0828

PERSONAL PROFILE

Full-stack developer and cloud architect with hands-on experience in web applications, scalable APIs, databases, and cloud solutions. Experienced with React, Node.js, Java, SQL/NoSQL databases, and cloud architecture. Passionate about combining software development, cloud computing, and problem-solving to build efficient and scalable digital solutions.

EXPERIENCES

GOOGLE GEMINI STUDENT AMBASSADOR

Aug 2026 - Present

- Selected for a nationwide leadership and digital empowerment program focused on Google Gemini AI.
- Served as an AI representative, building connections with students from all regions of Brazil to share practical insights and foster the adoption of artificial intelligence tools.
- Creating promotional materials, including graphic assets and video content, to educate the university community about AI technologies.

CLASS REPRESENTATIVE / CLASS LEADER – UNIFACISA

Apr 2025 - Present

- Representing the class in communication with professors and university coordination.
- Organizing and sharing academic information, schedules, and announcements with classmates.
- Coordinating class activities and supporting collaboration among students.
- Facilitating communication between students, professors, and university coordination.

CLOUD ARCHITECT (INTERN) - VOLER CLOUD

Jan 2026 - Mar 2026

- Supported the design and deployment of GCP architectures, strictly adhering to Google's security (e.g., Security Command Center) and networking best practices.
- Managed and configured diverse GCP services, focusing on proactive cloud cost reduction and performance optimization.
- Created a comprehensive technical knowledge base, including SOPs, architecture diagrams, and networking guidelines to streamline GCP operations.

GLOBAL NOMINEE – NASA SPACE APPS CHALLENGE 2024

October 2024

- Co-led a team representing Campina Grande, Brazil, at the NASA Space Apps International Hackathon.
- Developed the project's website, authored all English content, and produced the final video presentation for a fictional ocean ecosystem based on chemosynthesis.
- Achieved global recognition, with the project being selected as a global highlight from thousands of worldwide entries. I was selected as a finalist for NASA Space Apps Global 2024, and my team and I also took 3rd place in the local competition!

EDUCATION

UNIFACISA

Feb 2024 - Jul 2028

Information Systems student focused on software development, problem-solving, and hands-on learning. Experienced in applying Object-Oriented Design and building full-stack applications using React, Node.js, GraphQL, and MongoDB. Since 2024, I have successfully delivered diverse academic and personal projects in both English and Portuguese, adapting quickly to new technologies.

SKILLS

- **Backend:** Java, Python, JavaScript, Node.js, Express, REST API
- **Frontend:** HTML, CSS, JavaScript, TypeScript, React, Vite, Tailwind CSS, Bootstrap, Figma
- **Database:** MySQL, PostgreSQL, MongoDB, SQL, NoSQL, Mongoose
- **Cloud / DevOps:** Google Cloud, Docker, Terraform, Git, GitHub, GitLab, GitLab CI/CD, Render, Vercel, CI/CD

CERTIFICATIONS

- **AWS Cloud Quest** - Cloud Practitioner (12h) | AWS | Sep 2026
- **Google Cloud Skill Badge** - Develop Your Google Cloud Network (6h) & Build Infrastructure with Terraform (2h) | Apr 2026
- **VIRTUS** - Fundamentals of Intelligent Sensing Platforms for Industry (20h) | Apr 2026
- **Fundação Wadhwani** - Ignite 2025 Entrepreneurship Program (40h) | Apr 2025
- **SCRUMstudy** - Scrum Fundamentals Certified (SFC) (10h) | Apr 2025
- **DIO & Microsoft** - Bootcamp Microsoft AI for Tech: GitHub Copilot (15h) | Jan 2025
- **Microsoft & LinkedIn** - Career Essentials in Cybersecurity (5h) | Aug 2024
- **Fundação Bradesco** - Information Technology Security (15h) | May 2024
