 - **Stack:** React • JavaScript • HTML • CSS • Node.js • Express
 - **Project link:** [OhTroca](#)

LAVINIA DONATO RIBEIRO

Full Stack Developer & Cloud Computing

PERSONAL PROFILE

I am a full-stack developer specializing in modern web applications, scalable APIs, and cloud solutions. I have experience with React, Node.js, Java, SQL/NoSQL databases, and cloud architecture using Google Cloud Platform. I strive to combine creativity, logic, and technology to build intuitive and efficient digital products.

EXPERIENCES

Global Nominee – NASA Space Apps Challenge 2024

October 2024

- I represented the Campinense Space Agency at NASA’s international hackathon, collaborating on a project for a fictional ocean ecosystem based on chemosynthesis, which was selected as a global highlight from among thousands of entries.

Cloud Architect (Intern)

Jan 2026 – Mar 2026

- Support for designing cloud architectures using Google Cloud Platform
- GCP service configuration
- Networking, security, and cloud best practices
- Cost and performance optimization
- Technical documentation

EDUCATION

UNIFACISA

Feb 2024 - Jun 2028

- I am currently studying Information Systems at UNIFACISA, with a focus on software development, databases, and back-end technologies, gaining practical experience in programming and problem-solving.

CERTIFICATIONS

Highlights

Google Cloud Skill Badge — Build Infrastructure with Terraform on Google Cloud

Google Cloud Skill Badge — Develop Your Google Cloud Network

Fundação Bradesco - Information Technology Security

Fundação Wadhwani - Ignite 2025 Entrepreneurship Program

VIRTUS - Fundamentals of Intelligent Sensing Platforms for Industry

- **Locket** - A web application inspired by the Locket album, featuring authentication and a custom profile.
 - **Stack:** React • JavaScript • Node.js • Express • MongoDB • CSS
 - **Project link:** [Locket](#)

Bootcamp Microsoft AI for Tech - GitHub Copilot

- I completed a bootcamp focused on Git, GitHub, and using GitHub Copilot to improve coding efficiency and quality.

Career Essentials in Cybersecurity by Microsoft and LinkedIn

- I completed a course on the fundamentals of cybersecurity, focusing on network security, data protection, and risk management.

Scrum Fundamentals Certified (SFC)

- I have completed a certification in the fundamentals of Scrum, gaining knowledge of agile methodologies, Scrum roles, and their application in project management and team collaboration.
